SIGNED:

Jim Dudley (T) Rich Thompson

TIME AND DATE

FORECAST ISSUED:

8/14/14 @ 1900

**Incident Meteorologist** 

**WEATHER DISCUSSION:** A ridge of high pressure will remain over the area through Sunday. Winds aloft will remain weak with terrain and slope winds dominating. Little day to day change in temperature and relative humidity trending is expected with moderate overnight recoveries. For Monday and Tuesday a weak area of low pressure will form off the Northwest California coast with increased onshore flow and slightly cooler temperatures.

### **WEATHER FORECAST:**

WEATHER:

Clear.

TEMPERATURES:

Min:

Max: 85-93...except 80-87 ridgetops/upper slopes. 50-60...except 62-67 ridgetops/upper slopes.

### **OUTPUTS**

### FIRE BEHAVIOR

### GENERAL

\*\*Occasional short runs possible in green islands\*\*

Fine Dead Fuel Moisture Predicted: 4% Unshaded, 7% Shaded

Live Fuel Moisture= CHAMISE (50-60%) MANZANITA (75-80%) \*both critical\*

Probability of Ignition = 50% Shaded fuels, 80% Unshaded.

Spotting Distance= 1/4 mile Forecast ERC: 67 ~90<sup>th</sup> percentile Forecast Burning Index: 85

- Expect backing surface fire in timber understory.
- Surface fire in the brush with transition to canopy possible when winds align with slope. Group torching and short runs possible with torching Max flame lengths up to 75' and 120 ch/hr.
- Surface fire transition to crown possible when *sustained* eye level winds within the fuel sheltering are greater than 6mph.

### **SPECIFIC**

### Branch II

Favorable winds contribute to slow, backing fire behavior toward the north into Little Low Gap Creek and the Eel River.

### **Branch IV**

Re-burn potential exists within green islands where fire intensity was not adequate to consume the over story. Winds may align with drainages and ignite these areas. Spotting and rollout will continue to challenge crews sending embers up to ¼ a mile. Terrain dominates the diurnal wind flow within the Eel River Drainage.

Location / Fuel Type	Max Flame Length	Max Rate of spread	Spotting	Probability of Ignition
All Divisions: Timber-Shrub	< 10'	<13 ch/hr	1/4 mi	50-70%
Divisions K,L,M,N Moderate Load Timber Litter	< 6'	<11 ch/hr	1/4 mi	50-70%
Mid-slopes Broadleaf Litter	< 2'	<2 ch/hr	1/4 mi	50-70%
Upper slopes/Isolated patches- Brush	<20	<75 ch/hr	¼ mi	50-70%

### AIR OPERATIONS:

Inversion over the fire area until 1200 below 1000'AGL.

Mixing height 7000' AGL

### **SAFETY**

Watch for falling rocks and fire weakened trees as fire burns through co-mingled surface fuels and duff. Heavy fuels and stumps will have extended burnout and complete consumption be aware of under-ground weakened roots and compromised support structure.

# SAFETY MESSAGE "LODGE COMPLEX"

CA-MEU-007202 August 15, 2014 0700-0700

# **MOP-UP AWARENESS**

Awareness – Numerous injuries and near-miss incidents have occurred to firefighting personnel performing mop-up operations

Mitigation – Maintain your Situational Awareness while on your assignment and ensure you are wearing your full PPE

- Stump holes can be very deep and hold heat for an extended period of time.
- Keep reassessing the trees in the area you are working for potential fall hazards and utilize fallers as needed.
- Ensure your crews are wearing full PPE.

### It only takes a few seconds to:

- Put your helmet and gloves on
  - Look up, down, and around for potential hazards

### Because it only takes a few seconds to:

- Sustain a burn injury!
  - Get hit by a falling branch!

## DEMOB

### **ACCIDENTS CAN HAPPEN DURING DEMOB**

### Be on the lookout for vehicle and pedestrian congestion

- Vehicles will be moving in tight areas around Ground Support and parking areas.
- Increased backing and maneuvering of vehicles in tight spots.
- Crews may be in a hurry to leave the incident due to reassignment.

Mitigation – Maintain high levels of situational awareness through the demob process.

- Provide back-up and spotter personnel more than one may be required.
- Drive safely and be on the lookout for ICP pedestrian traffic.
- Drive safely and monitor fatigue when traveling to home unit of new incident.

Mike Waters
SAFETY OFFICER
CAL FIRE IMT 4

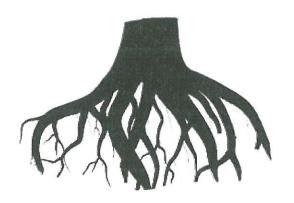

18

# STUMP HOLE AWARENESS

Awareness – Numerous burn injuries have occurred to firefighters during mop-up operations, from hazards that they did not anticipate

# Mitigation – Maintain your Situational Awareness while on your assignment and when working in and around burned areas

- Stump holes can be very deep and hold heat for an extended period of time.
- Often times, there will be no smoke or visual warning of the hazard below the ground.
- PPE is a simple way to prevent a majority of injuries that occur during mop up operations.
- Look for the central hole of a previous tree, surrounded by a large patch of white ash, and anticipate a weakened ground structure around that area, sometimes as large as 5 10 feet wide (or more). Areas impacted can also include roadways, if the root system was large enough and grew underneath the road.

- Resources report to Demob trailer at the times posted on the tentative demob list which is posted around the Incident Base.
- Resources will get signatures from the following units prior to departing incident base:
  - o Motels
  - o Supply
  - o Training (If they have a trainee)
  - o Communications
  - o Saw Shop
  - o Documentation
  - o Time
- Resources will then report to Howard Forest Training Center for ground support inspection.
- Once completed with ground support and the ICS #221 has been given to the demob representative at Howard Forest, resources then are approved to continue to reassignment or released back to home unit.

### TRAINING SPECIALIST MESSAGE

# **Trainer / Mentors:**

If in the event:

You are leaving the incident before your assigned trainee

Or

Your trainee is reassigned
You must complete a performance evaluation for the
period the trainee was assigned to you

### TRAINEES:

Beat the Rush!!

In order to receive documented credit for your training

assignment – you must close out with the Training

Specialist before you Demob!! If you're ready – DO IT

NOW!

Bring the following to the "exit interview"

- A completed and signed ICS 225
  - Taskbook

Forms are available at the Training Office

# **CAL FIRE**

# WATER USAGE PLAN

# California Drought Emergency

The following shall be considered and implemented by all fire resources as a means to provide maximum efficiencies when utilizing water resources, while minimizing the impacts to private and public water supplies. Accountability shall be maintained for all water supplies that are utilized and care should be applied to ensure proper replacement and/or reimbursement to the supplier/owner.

# Fireline personnel- (During mop up operations)

- Use Pencil Hose and Garden Nozzles with Shut-Offs.
- Use Back pumps.
- Use Dry Mop-up and consolidation of heavy fuels to areas where they can burn out safely.
- Locate/Relocate Firelines to lighter fuels or natural barriers when safe.
- Set up and use portable tanks in anticipation of longer transport times for Water Tenders.
- Use of foams, gels and other water enhancers.
- Evaluate need to mop up in excess of 200 feet from fireline.

### Road Maintenance and Repair-

- Monitor and water roads only when and where needed.
- Water when most effective (evening and nights).
- Use chemical treatments when available (Magchloride, Omni bind etc.).
- Consider use of tertiary or treated water.

### Aviation Operations-

- Consider use of Gels, Foams and Retardants. Set up portable plants.
- Consider using Blivits and Pencil Hose for interior mop up operations as opposed to numerous bucket drops.
- Establish and use pre-use agreements for existing and known water sources.
- Use large watershed dip sites when able. Minimize use of small, static ponds and lakes.
- Maintain accountability of water used and locations of dip sites.
- Evaluate need for interior bucket drops.

### Private Water Supplies-

- Notify property owner as early as possible.
- Minimize usage and develop alternative water supplies when and where appropriate.
- Track usage (meter, ICS-214 Water Usage Reports) and develop a plan to replace water.
- Make arrangements for reimbursement and damage claims if needed.

# Public/Municipal Water Supplies-

- Notify Agency as soon as possible and request a representative to the incident.
- Identify fill areas and request metering devices. Note locations on incident map.
- Use alternative or reclaimed water sources when available. Note locations on incident map.
- Make arrangements for reimbursement and damage claims if needed.

# Management and Supervision-

- Use leaders intent and establish Water Conservation as a Management Objective.
- Consider complexity of water use on incidents. Establish a Water Supply Group Supervisor to coordinate additional resources to support the incident needs.
- Complete the Water Usage Report daily and turn in to Finance.
- Review this check list and brief daily.
